QA Engineer

Contact me: +48 577-629-317 • @liontdv • liontdv@gmail.com • LinkedIn • GitHub

SUMMARY	I'm Engineer with big background from working in Automotive industry in multinational company. Skilled in finding>analyzing>solving problems in product to meet client target. Have a huge experience in working and creating documentation (specs, manuals, non-conf. reports), training and mentoring newcomers and creating/conducting trainings (also group). Tightly co-work with related departments (QA, PM, Production, Process, etc). Also have an experience with Leading a small team of engineers. So, my work expirience, education and hobbies giving me a great technical soft- and hard-ware backgroung to feel free during studing for QA Engineer.
RELEVANT EXPIRIENCE **FROM ANOTHER INDUSTRY**	From 2018 i`ve work in LG Energy Solution (battery production for EV/PHEV) on a different positions (from worker to manager) and departments (Production, Process). Tightly cowork with Quality(In/Out) and PM`s, etc. Our clients was VW AG, BMW AG, Volvo, Reanult – and contacting with them also was one of my role. All work relates to problem solving and improving the production to satisfy our client and avoid NotGood production come out. I`ve work with product/part specification`s, create a lot of manuals, non-conformity reports (like those in IT, but more demanding). Worked individually and in group. Last 2 years worked with ComputerVision and was responsible for creating, setup and configuring fully automated quality inspection units. The biggest personal achievement is 40M Euro/Annually by speeding up the production line.
HARD SKILLS	- QA Role&Responsibility; SDLC, STLC; CI/CD; Agile - Test Design, techniques and documentation prep. (Jira) - Web (HTML,CSS,DevTools) - API (Postman) - Bash, Android Studio - SQL - Git - Experienced Windows User - Proxmox - Home Automation - CAD
